PROFESSIONAL SUMMARY

IT Operations and Security Professional with 10+ years of experience supporting enterprise infrastructure, cloud services, access administration, and production environments. Experienced in user provisioning, authentication support, access governance, monitoring, troubleshooting, and cloud operations. Currently focused on Identity and Access Management (IAM), Security Platform Engineering, and Cloud Security through hands-on projects, labs, certifications, and open-source cybersecurity development.

KEY HIGHLIGHTS

- 10+ years supporting enterprise IT operations, infrastructure, and production environments.
- Experience with access administration, user provisioning, authentication support, and account governance.
- Built cybersecurity-focused open-source projects including Blitz DFIR, Blitz SOC, and Blitz TraceGrid.
- Hands-on experience with AWS, Linux, Docker, Datadog, Splunk, SQL, LDAP, OAuth2, OpenID Connect, and RBAC.
- Strong background in troubleshooting, incident response support, root cause analysis, and operational support.

TECHNICAL SKILLS

Identity & Access Management: Keycloak, OpenLDAP, LDAP, OAuth2, OpenID Connect, RBAC

Cloud & Platforms: AWS, Docker, Docker Compose, VMware

Operating Systems: Linux (Ubuntu), Windows

Monitoring & Operations: Datadog, Splunk, NMS

Networking: TCP/IP, DNS, DHCP, VPN, VLAN, Cisco

Automation: Python, Bash, PowerShell, Git

PROFESSIONAL EXPERIENCE

Technical Operations & Cloud Support Specialist | Focus Support Associates (2020–2025)

- Supported user provisioning, access administration, and account governance activities.
- Administered AWS user access requests and cloud-related operational tasks.
- Monitored infrastructure and applications using Datadog and related monitoring platforms.
- Performed incident triage, troubleshooting, and root cause analysis for production issues.
- Supported SQL Server and PostgreSQL operational requirements.
- Created technical documentation and mentored junior team members.

Technical Support Analyst – Google Nest | Sykes Asia (2020)

Provided advanced technical support for Google Nest products, networking, account management, device onboarding, cloud-connected services, and smart-home integrations.

NOC Engineer I & Remote IT Support | Atos IT Services (2015–2019)

- Monitored enterprise infrastructure, alerts, operational events, and service health.
- Supported authentication, account administration, and access-related requests.
- Investigated incidents, outages, and service disruptions.
- Participated in patching, maintenance, and change management activities.
- Collaborated with network, systems, application, and security teams to maintain service availability.

PROJECTS

Blitz DFIR

Autonomous DFIR investigation platform built for SANS SIFT that orchestrates forensic tools, normalizes evidence, correlates activity, documents uncertainty, and generates audit-backed reports.

Blitz SOC

Explainable security operations platform combining deterministic workflows, local orchestration, and AI-assisted analyst investigations.

Blitz TraceGrid

Visual execution intelligence platform designed to help developers and reviewers understand AI-generated software behavior, trust boundaries, and execution flows.

EDUCATION

Bachelor of Science in Computer Science

Eulogio 'Amang' Rodriguez Institute of Science and Technology (EARIST), Manila

CERTIFICATIONS

- ISC2 Certified in Cybersecurity
- Fortinet NSE 1 & NSE 2
- OPSWAT Security Associate
- IT Security Programme – Global Knowledge Management Center
- Windows Server Administration & Active Directory Training
- Cisco Networking and Switching Training
